Building the circular economy through education & infrastructure

Reduce your Waste Footprint

The Zero Waste Toolkit is a holistic waste management service that provides you with the insights, design, infrastructure, training and ongoing support to help you take control of your waste and reduce your waste footprint.

We do Everything Affordably

Waste Audit

quick audit that provides you clarity on your waste situation and how to improve it.

Customised Waste System and Design

proposed solutions to address your waste management issues.

Implementation and Installation

of your new waste system and infrastructure, including setup of your recycling and food waste service providers.

Training and Education Workshops

with all staff members, employees and or residents in waste management best practices and how to use your new system.

Ongoing Support

a dedicated WhatsApp support group, and administration with your recycling and food waste service providers.

Municipal Bill Reduction

we help you reduce your monthly municipal waste bill

Waste Reports

Monthly and quarterly waste reports and marketing material for you to share the impact you are creating.

We endeavour to help you incorporate progressive waste and environmental protocols into your operations so that your waste is disposed of in the most ecologically responsible manner possible.

Take the First Step

Start with a quick and affordable waste audit of your premise and operations. Contact us now:
